High-quality Double Arm Cantilever TV Bracket

Integrated LED RGB Uplights

Free Nationwide Installation\*

## Electrical Socket & TV Service Placement

There are 3 important steps you will need to have completed prior to your installation:

### 1. Have your electrical points / sockets in place

Once you have chosen the position your media wall is going to sit on your wall, you will need to do the following to ensure your electrical points / sockets are in the correct place.

All electrical work must be undertaken by a qualified electrician.

Based on the design and size of your chosen media wall, find the centre point by halving the width of the top section (TV Unit) of your media wall | 55" TV Unit - 1680mm | 60" TV Unit - 1800mm | 65" TV Unit - 1900mm | 75" TV Unit - 2130mm. Mark this point just above the floor on the wall. (you can use a pencil to make a faint mark that can be rubbed out afterwards).

Measure 1200mm (120cm) from the floor up and mark this point.

Now measure 350mm (35cm) from that point to the right. This will give you the bottom left start point of your zone.

Draw your zone width 150mm (15cm) and height 450mm (45cm). The amount of sockets required will depend on what you intend to power. We recommend at least two 2 gang sockets for the fire, lights and your TV.

Consider what else you are going to need power for, i.e. Sky or Virgin box, Internet router, games console, Firestick.

If you are still unsure then please call us on **0300 380 7077** and one of our team will be happy to talk you through it.

### 2. Have your TV services in place

Using the same method for your electrical points, create a zone to the left of your centre line for your TV services. This could be one or more of the following: Sky or Virgin, TV coax aerial, internet point (RJ45 socket).

You can get any TV aerial or data cable company to do this for you, or if you are competent then you can undertake this yourself.

### 3. Make sure your room and wall are clear of any obstructions

Please make sure that the desired room of installation has full access and is free of any obstructions.

Any existing TV, bracket and furniture must be removed prior to arrival of our installation team.

SOLARE MODEL WITH CUTOUT FOR 60" TV SHOWN

SOCKET PLACEMENT APPLIES TO ALL MODELS - PLEASE STAY WITHIN GREEN ZONES
